

Statics

## Cost Report

### What is the Cost Report?

The Formula Student is divided into dynamic and static disciplines. In the static disciplines, the vehicle is presented to a panel of experts and evaluated in terms of design, financial planning and business strategy. The static disciplines include the Engineering Design Event, the Cost Report and the Business Plan.

In the so called "Cost Report", the manufacturing processes including their costs have to be listed for all components and a small series production of the racing car has to be presented. In addition, general economic and finance related topics are discussed with judges from the industry at the competition.

If you are interested in being creative and present your work convincingly at competitions throughout Europe, then we are looking forward to your application.

### What will be your tasks?

- Familiarization with and analysis of the production of a race car
- Preparation of a complete parts list of our current race car
- Dealing with daily economic and financial topics
- Presentation of the cost report at events during the summer
- Collaboration in cross-group tasks (e.g. testing, manufacturing)

### What are our requirements for you?

- Preferably studies in the field of industrial engineering
- Confident handling of MS Office
- Very good English skills
- Ability to work in a team
- Creativity, self-confident appearance and an eye for aesthetics
- Independent, structured way of working
- Willingness and dedication to the project

One Goal.  
One Team.
