

We are a highly motivated team of students from various disciplines dedicated to designing and building race cars for the world's largest student competition, Formula Student. Our mission is to design innovative and competitive racing cars and thus train the next generation of engineers and developers.

Besides the development of our race car, there are some tasks that require the skills of a good web developer. Be it maintaining, expanding, or improving our website and application portals. The possibility to work on tools that not only make life easier for the team but ultimately help them to qualify for the events and to be successful there, or the extended digitalization and automation of our workflows.

What will be your tasks?

- Keeping the website up-to-date
- Development of a partner network
- Improvement of the internal Quiztool
- Conceptualization of possibilities for digitization
- Expansion of cell partnership interface
- Maintain website Newsletter
- Collaboration on cross-group tasks (e.g. testing, manufacturing)

What are our requirements for you?

- Motivation and team spirit
- CSS, HTML, JavaScript basics
- Participation in weekly appointments
- Experience in Web Development is advantageous
- Programming experience is advantageous

One Goal.
One Team.
